

The undersigned registered voters of the Town of Brattleboro hereby petition the Selectboard to make a warning for the following article to be voted on by the representatives of the town at the next Representative Town Meeting. This article is to be advisory.

1. It is hereby resolved that Representative Town Meeting shall advise the Selectboard that the Selectboard shall not commission additional studies on fossil fuel consumption, carbon footprints or efficiency of insulation, heating or air conditioning systems until the town implements common sense practices to reduce fuel consumption in town buildings, including practices such as:
  - a. Lowering the thermostat setting during the winter to a significant degree, and wearing long-johns, sweaters and other warm clothing.
  - b. Mounting and sealing of doors, windows, and storm windows
  - c. Raising of thermostat in the summer or use of electric fans instead of air conditions, and wearing cool clothing-avoiding layered suits and blazers.
  - d. Other common sense measures per the discretion of the energy coordinator.
2. It is hereby resolved that Representative Town Meeting shall advise the Selectboard that it is of utmost importance to replace the Energy Coordinator as soon as possible.
3. It is hereby resolved that Representative Town Meeting shall advise the Selectboard that the Selectboard shall enlist the Energy Coordinator in implementing sections 1a through 1d of this ordinance and shall be responsible for submitting a report to the town manager indicating the implementation of these practices and recommending further energy studies if any might be in order.
4. It is hereby resolved that Representative Town Meeting shall advise the Selectboard to adopt an ordinance requiring conservation measures to be taken by businesses and residents of the Town consistent with the above stated resolutions.
